## VITICULTURE

Multiple sub blocks of Syrah are grown at our home vineyard site. These consist of hillside and river flat blocks all with different clones, aspects and slopes. All blocks are managed to their own unique requirements, including hand canopy management, with Syrah this is essential to control the vigour and wild growth.

## WINEMAKING

All vineyard blocks were picked and fermented separately at optimum maturity. Grapes were destemmed and underwent a short cold soak prior to fermentation. Daily pump overs and hand plunging are used for delicate extraction. Wines were aged in French oak (15% new) for 11 months prior to bottling.  
Vegan Friendly.
