Riesling — 2025

Native Country: Rhine River region - spanning Germany, France, Austria, and Switzerland.

Global Plantings: 136,000 acres / 55,000 hectares - found in Germany, USA, France, Australia, Austria, Italy, Canada, Chile, and New Zealand

From dry to lusciously sweet, this often-misunderstood white is one of the world's greatest cellaring wines. A natural partner to spicy Asian cuisine, it's as versatile as it is age-worthy.

Vinification

Grapes were machine harvested in the cool of the morning, then cold settled and cool fermented in stainless steel tanks. The wine was blended and finished before bottling in spring.

Tasting Notes

Off-dry and simply delicious - a must for serious Riesling lovers. Bursting with the vibrant fruit of the Southern Valleys, grounded by the stony minerality of river gravels, and lifted by a crisp, dry acidity. Drinking beautifully now, with the structure to cellar for over a decade... if patience is your thing.
